These data do not include "other" and "unknown" categories; King County data are not comparable and are not included.

**KING
COUNTY
JUVENILE
COURT CASE
RESULTS**

***Between 1995 and 2001
cases referred to the
prosecutor decreased by
42 percent.***

King County Office of the Prosecuting Attorney provided data on juveniles referred to King County Juvenile Court. Data on gender and race/ethnicity are not available.

In 2001, 9,164 juveniles were referred to the prosecutor in King County. Of this number, 3,169 (35 percent) were referred to diversion; charges were filed on 4,561 (50 percent); and there was no action on 1,393 (15 percent). During this time, 41 juveniles were remanded to adult court.

Between 1995 and 2001, the number of cases referred to the prosecutor decreased by 42 percent, cases referred to diversion decreased by 44 percent, and cases remanded to adult court increased by 78 percent.

Of the juveniles referred to diversion in 2001, 77 percent completed diversion, and 43 percent did not complete, refused or were refused diversion (does not add to 100 percent due to carryover cases from the previous year). Ninety-three percent of those diversion cases where the juvenile did not complete the diversion agreement, refused, or was refused diversion resulted in charges being filed.

Of the juveniles adjudicated in 2001, 67 percent resulted in a guilty finding (found guilty or plead guilty), two percent were found not guilty; and 31 percent of the charges were dismissed. The rate of adjudicated charges dismissed has increased by eleven percent from 2000 to 2001.

.

TABLE 79
CASES REFERRED TO KING COUNTY JUVENILE COURT

	2001	2000	1999	1998	1997	1996	1995	% Change 1995-2001
Referred to Prosecutor	9,164	10,614	11,895	13,720	13,304	16,220	15,834	-42%

No Action	1,393	1,083	818	895	1,135	1,927	2,975	-53%
Remand to Adult Court	41	36	33	40	34	8	23	78%

DIVERSION

Diversion Completed / No Charge	2,436	2,887	3,164	2,964	2,677	2,912	2,947	-17%
Diversion Not Completed / Refused	1,380	1,622	1,935	2,284	2,259	3,099	2,543	-46%
Diversion Charges Filed	1,283	1,508	1,780	2,101	2,146	2,407	1,816	-29%
Diversion Charges Dismissed After Filing				(Included in total dismissal count)				
Diversion Charged/Not Filed After Rejection	97	114	155	183	113	692	727	-87%

ADJUDICATION

Adjudicated Charge Dismissed*	1,190	1,322	2,883	1,911	1,901	2,810	2,507	-53%
Adjudicated Found Not Guilty	65	102	171	130	149	147	189	-66%
Adjudicated Guilty (found guilty and plead guilty)	2,596	3,222	4,826	4,356	3,708	4,473	3,827	-32%

* Includes completed diversion dismissals.

These data were obtained from the King County Office of the Prosecuting Attorney, Criminal & Juvenile Division; 2001 data received September, 2002.

Data on Disposition of Guilty Cases is not available (Standard Range, MI, JRA Standard Range, JRA MI).

JUVENILE DETENTION

Since 1991, the number of juveniles held in detention has increased by 79 percent.

RACE AND ETHNIC DISTRIBUTION

Washington has 20 county-operated detention facilities, which are maintained by the juvenile courts, and one regional center maintained by a consortium of counties. Juveniles from all 39 counties are held in these 21 facilities.

Juveniles are held in local detention facilities to await court hearings or as sentenced offenders. Some facilities also hold juveniles sentenced to the State Juvenile Rehabilitation Administration.

Juvenile detention population figures used in this report were provided by the Office of the Administrator for the Courts. Population figures represent each entry into the detention database (episode), where a juvenile was held for four hours or longer. Juveniles who are over the age of 18 and who are under the jurisdiction of the juvenile court, or who have been remanded to adult court, are also included in the detention population data. A juvenile may be held in detention more than once within a year depending on the number of times the juvenile offends. Changes in the method of tabulation may account for differences in population data from previous years.

The number of juveniles held in detention facilities in 2001 (32,898) decreased by four percent from the number of juveniles held in 2000 (34,382). Since 1991, the number of juveniles held in detention has increased by 79 percent.

Facilities that experienced an increase from 2000 to 2001 of over ten percent in the number of juveniles held in detention include: Clallam (13%), and Okanogan (12.7%). Facilities experiencing a decrease of over ten percent include: King (14.6%), Lewis (10.4%), and Skagit (22.6%).

Reporting of race and ethnicity of juveniles held in detention has increased since 1986. Consequently, the rate of increase in detention population may be overstated. Minority youth, age 10-17, representation in detention has shown a steady decrease from 38.2 percent in 1996 to 28.7 percent in 2001.

Facilities with a non-white juvenile population above the statewide average rate (28.7%) include: Benton/Franklin (42.6%), Chelan (32.2%), Grant (46.2%), King (41.4%), Medical Lake (34.5%) Okanogan (62.5%), Pierce (39.8%), Skagit (29.5%), and Yakima (47.5%).?

The race and ethnic distribution of the detention population during 2001 showed that 66 percent were White, 11 percent were Black, five percent were Native American, three percent were Asian/Pacific Islander, and ten percent were Hispanic. Race or ethnicity was not reported for five percent of the detention population. These figures show the following percent

? Non-white juvenile population of Benton 19%, Franklin 47%, Chelan 25%, Grant 30%, King 32%, Okanogan 36%, Pierce 29%, Skagit 20%, and Yakima 46%

**JUVENILE
DETENTION
(continued)**

GENDER

changes since 1996: four percent increase in the White population, four percent decrease in the Black population, one percent increase in the Native American population, one percent decrease in the Asian population, no change in the Hispanic population, and no change in the not reported category.

.....

Females held in detention facilities during 2001 represented 26.9 percent of the detention population. This was an increase of 2.4 percent from the 2000 rate of 26.3. The percentage of females held in detention centers has steady increased by 52.8 percent since 1992.

**JUVENILE
POPULATION IN
THE JUVENILE
REHABILITATION
ADMINISTRATION
(JRA)**

***The JRA residential
and institution
population decreased over
the last four years.***

The county juvenile courts commit the most serious offenders to JRA. With rare exception, youth committed to JRA have been adjudicated for at least one violent offense, or a large number of various offenses.

JRA operates the following secure residential facilities:

- ?? Three **medium to maximum security institutions** (Green Hill School, Maple Lane School, and Echo Glen Children's Center).
- ?? One **medium security youth camp** (Naselle).
- ?? One **basic training camp** (Camp Outlook), which is operated through a contract with Second Chance, a private non-profit corporation.
- ?? Seven **minimum-security state-run contracted facilities** providing custody and treatment for committed offenders and contracted facilities providing custody and treatment for omitted offenders and contracted community facilities for additional beds.
- ?? Echo Glen, Naselle and Camp Outlook provide services for female offenders.

Juveniles released from these facilities may be supervised in the community for up to 18 months; most sex offenders are supervised for 24 to 36 months. (Youth assessed among the 25 percent highest at risk to re-offend receive a mandatory six months of intensive supervision. Regular paroled youth receive 12-24 weeks, based on their risk to re-offend)

JRA provides specialized drug and alcohol treatment services to chemically addicted juvenile offenders. JRA currently operates three separate intensive inpatient chemical dependency programs, two intensive outpatient programs, and one recovery house and long term care chemical dependency program. Other institutional and community programs include; drug and alcohol assessment, intervention, education, and aftercare. Sex offenders are provided assessments, treatment and resources throughout the JRA system. Offenders with mental health disorders are given assessments, appropriate medication management and treatment services.

The percentage of violent offenders steadily decreased from 1996 to 2000 (from 59 percent to 42 percent). The percentage of serious violent offenders increased from 37 percent during the first six months of 1995 to 59 percent during the last six months of 1995. This change was a result of including restricted offenders (serious offenders under age 15) in the definition of serious violent offenders (age 15 or older).

The residential program and institution populations decreased over the last four years. (From 1990 to 1997, the populations in institutions steadily increased.)

**JUVENILE
REHABILITATION
ADMINISTRATION
(continued)**

The average daily population in all *residential programs* for the first six months of 2002 was 1,099, a decrease of four percent from the 2001 average daily population of 1,142. From 1997 to 2001 the average daily population has decreased by approximately 21 percent.

The average daily population of juveniles in *JRA institutions* for the first six months 2002 was 923, a decrease of four percent from the 2001 figure of 959. From 1997 to 2001 the average daily population has decreased by approximately 11 percent.

The average daily population for *community placement* for the first six months of 2002 was 177. This figure is a decrease of four percent from the 2001 figure of 184. From 1997 to 2001 the average daily population has decreased by approximately 50 percent. (This decrease can be attributed to a change in JRA policy.)

The average daily *active parole caseload* for the first six months of 2002 was 964, a decrease of almost eight percent from the 2001 figure of 1,046.

.....

**RACE AND ETHNIC
DISTRIBUTION**

A one-day survey of JRA population for June 30, 2002, showed that: 57 percent were Non-Hispanic White, 18 percent were African American, six percent were Native American, 12 percent were Hispanic, 5 percent were Asian, and three percent "other."

The survey further showed that between 1992 and 2002, the percentage of Non-Hispanic White juveniles has remained relatively stable. For the same period of time, the percentage of Black youth decreased by eight percent, Native American youth remained the same, Hispanic and Asian youth both increased (from nine percent to 12 percent, respectively for Hispanic youth and from three percent to five percent, respectively, for Asian youth.

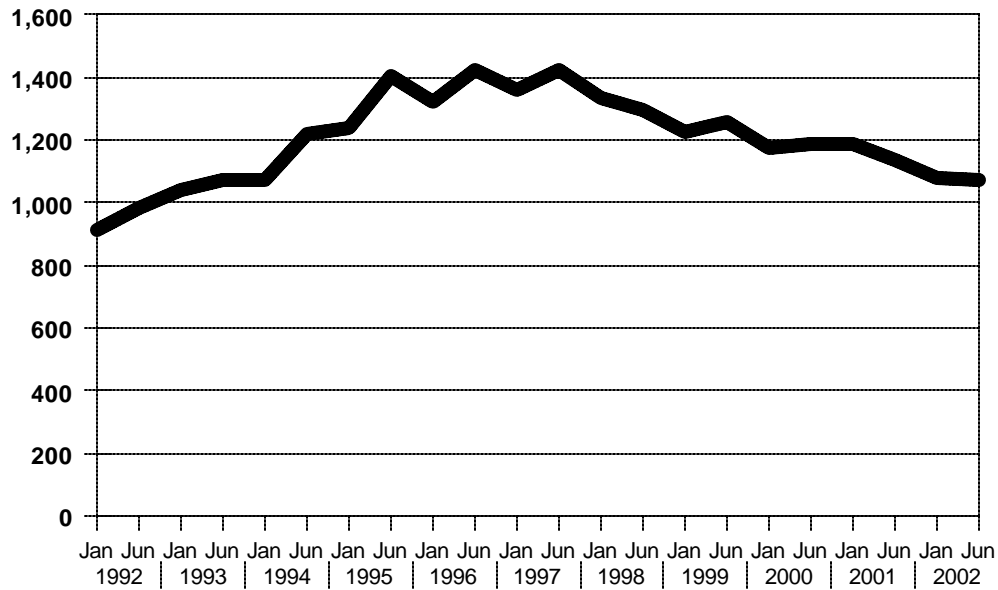

The percentage of non-white youth held in state juvenile correctional institutions for 2002 was 42.7 percent, relatively unchanged from 2001, but a decrease of 14.5% from 1990. Black youth were confined in state juvenile correctional institutions over four times their proportion of the general population (Black youth represented 4% of the juvenile population and 18% of the population in JRA in 2002).

The demographic characteristics of the JRA population on June 30, 2002 showed that 42.7 percent were non-white, 8.2 percent were female, 18.1 percent were sex offenders and 43.1 percent were violent offenders.

.....

GENDER	<p>The percentage of females in JRA for the first eight months of 2002, (8.2%) is essentially unchanged from the 2001 rate of 8.1 percent. The percentage of females in JRA has increased 51.9% from 1990 (5.4%) to 2002 (8.2%).</p> <p>.</p>

These data were provided by the Office of Research and Data Analysis, DSHS.

Data excludes residential JPS caseloads; includes both discretionary and sex offender cases.

Sex offenders have a mandatory 2-year period.

These data were provided by the Office of Research and Data Analysis, DSHS, and prepared by JRA.

In 3/99, JRA revised current and past data (from 7/90) using a more comprehensive indicator, consistent with current legislation, to define sex offenders.

CONSOLIDATED JUVENILE SERVICES

The CJS program, initiated in 1981, is a partnership between the state, county juvenile courts and the private sector, in which each shares in the cost of providing local comprehensive services to youthful offenders. These pre-commitment services include: diversion, probation supervision, individual and family counseling, drug/alcohol assessment and treatment, vocational training, and psychiatric and psychological services. There are CJS programs for at-risk youth in all 33 juvenile court jurisdictions representing the 39 counties.

The CJS funding allocations for FY 2002-2003, for CJS at-risk youth, is approximately \$14 million.. The funding formula used for determining at risk youth funding is:

- ~~///~~ 50 percent for the 10 to 17 year old population,
- ~~///~~ 10 percent for birth through 17 year old minority population,
- ~~///~~ 10 percent for TANF recipients,
- ~~///~~ 10 percent for criminal filings,
- ~~///~~ 10 percent for diversion referrals,
- ~~///~~ 10 percent for high school dropouts.

CJS At Risk

Counties applying for CJS funds for the 2001-2003 biennium must include efforts to address minority disproportionality in their plans. Any county applying for CJS funding that also operates a detention facility must have standards of operation in place. These include intake and admissions, medical and health care, communication, correspondence, visiting and telephone use, security and control, sanitation and hygiene, juvenile rights, rules and discipline, property, juvenile records, safety and emergency procedures, programming, release and transfer, training and staff development, and food service.

SSODA (*Special Sex Offender Disposition Alternative*)

In addition to these pre-commitment and prevention services, the state also funds two alternatives to standard commitment to juvenile rehabilitation facilities. The first, Special Sex Offender Disposition Alternative (SSODA), for first time sex offenders, allows the court to suspend the disposition of the offender and require the youth to receive treatment in the community. The total SSODA allocation for FY 2002-2003 is approximately \$5.3 million.

CDDA (*Chemical Dependency Disposition Alternative*)

The second alternative, legislated in 1997, created the Chemical Dependency Disposition Alternative (CDDA), as an alternative to standard commitment for juvenile offenders who are chemically dependent, with a standard range of local sanctions of 15 – 36 weeks and who haven't committed an A- or B+ offense. The sum of the confinement and outpatient treatment may not exceed 90 days. The CDDA funding allocation for FY 2002-2003 is approximately \$4 million.

**CONSOLIDATED
JUVENILE
SERVICES
(continued)**

CJAA (*Community Juvenile Accountability Act*)

In 1997, the Legislature passed the Community Juvenile Accountability Act (CJAA), a program to enable local courts to develop and administer community-based accountability and intervention programs, focusing on interventions shown to be effective in reducing recidivism among juvenile offenders. Functional Family Therapy, Aggression Replacement Training, Multi-Systemic Therapy, and Coordination of Services are the four CJAA interventions. The CJAA funding allocation for FY 2002-2003 is approximately \$6.5 million.

These funds, administered by the state, and allocated to counties, are combined into a single Consolidated Juvenile Services contract. This enables the counties to blend some of the funds into service packages that better meet the needs of youth and families.

Firearms on School Property

This allotment is used solely for the impacts of SSB 5214, (Firearms on School Premises), created in 1999, related to detention costs for firearms on school property. The Firearms on School Property allocation for 2001-2003 is \$32,000.
